

ADDRESSING YOUTH VAPING AND BEST PRACTICE SOLUTIONS PRESENTATION

The WISH Center can offer a limited number of vaping presentations at no cost to Wisconsin schools or organizations. In this presentation, participants will gain general awareness of the latest trends in vaping, guidance for substance use prevention in schools and how vaping connects to student mental health and wellbeing. Additionally, participants will explore student supports that promote intervention and cessation of vaping, including SBIRT, Restorative Practices, and the usage of policies that promote alternatives to suspension.

This presentation is designed for:

- Pupil Service Staff, Administrators, K-12 Teachers, CESA Networking Groups, Anyone Working With Youth

An hour and a half

January - December 2025

You Will Learn:

- vaping trends and connection to mental health
- youth vaping prevention and intervention programs
- policy and practices that support alternatives to suspension

REQUEST A PRESENTATION

- Limited number of virtual or in person presentations available at no cost
- Minimum 12 to maximum 50 participants
- Once the review process is complete, a WISH Team Member will reach out to you about whether we can meet your request.

The WISH Center was created in 2012 to provide statewide training and technical assistance to Wisconsin schools on topics related to safe and healthy schools. In 2024, we were awarded a grant from the Department of Health Services to address youth vaping in schools. For more information on the WISH Center visit our [website](#).
